No grease necessary—and the cakes do not stick, but are browned beautifully and baked thoroughly - light, deliciously appetizing and wholesome.

Heat the griddle. (Some women place a bit of batter near the outer edge of the griddle. When the batter browns, griddle is hot enough to bake cakes.) Then turn down the flame about one-half. Save fuel!

It now is possible for you to get shapes and styles of "Wear-Ever" utensils which have been unobtainable during the war because so many thousands of tons of aluminum have been used in making cooking utensils for soldiers and sailors.

The utensils which gave enduring service there will give lasting service here.
